LED PIXEL LIGHT

K1

Lighting Performance

Customizable for different LED options (RGB, RGBW, White, Dynamic White, Single Color). With two different versions: clear or diffused. Color resolution of 16 bits, effects are more stylish and smooth; Exceeding the DMX protocol with more capacity and flexibility by utilizing our proprietary

Lighting Structure

UV-resistant PC housing, Light-weight, Excellent anti shock ability, Long life and not easy to be aging or yellowing, can be mount on the building surface by bracket. The Steel wire and Aluminum Profile installation ensure reliable connections, while flexible and varied mounting options make it easy for installers to make LED fixture part of any structure

LED NEON FLEX

LED Neon Flex
(10x20mm, SPI Controllable)

Product Advantages

Ingress Protection Grade

Flame Retardant Grade

Anti-shock

Anti-UV
life span 50000 hours

salt spray corrosion resistance
it can be used
in the marine environment

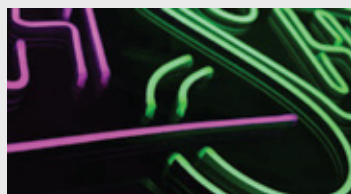

High-temperature
Resistance
⚙️ +55 C ❄️ -40 C

LED Neon Flex
(16x16mm, SPI/DMX Controllable)

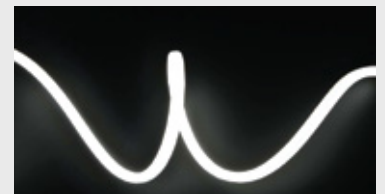

LED Neon Flex
(31x26mm, DMX Controllable)

LED Neon Flex
(6x12mm, Mono Color)

LED Neon Flex
(8x16mm, Mono Color)

LED Neon Flex
(Dia.14mm, Mono Color)

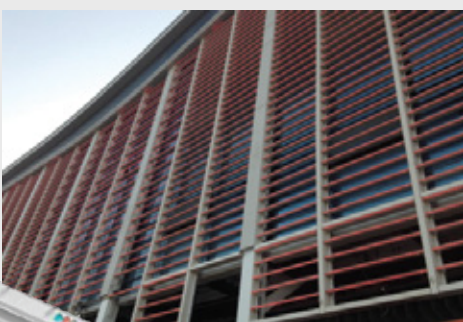

LED VIDEO TUBE

VIDEO TUBE-M

High-performance

High Frame rate 60Hz meets all kinds of video play requirements, smooth and no stuck. High gray scale RGB 16 bits (65536 grade)

Video Tube is a stylish, compact, easily dissimulated video fixture using high- performance LEDs to deliver uninterrupted lines of light. Each pixel is an RGB LED that is individually controlled and can display anything from uniform static colors to dynamic video lighting effect

VIDEO TUBE-D

A variety of installation

Suitable for seat mount, wall mount and with support frame, service is simple and convenience

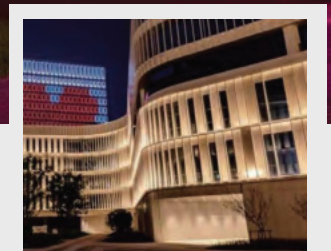

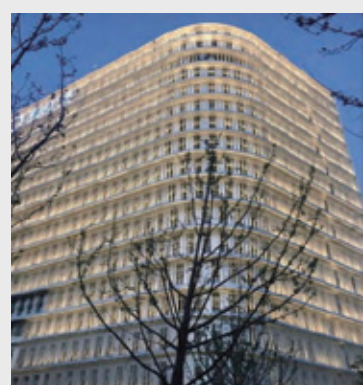

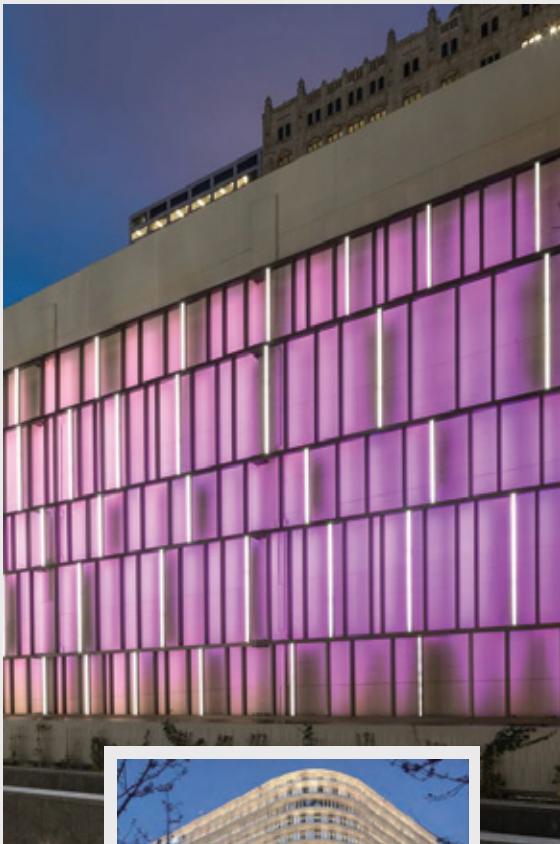

LED WALL WASHER SERIES

MONA

Lighting Performance

Customizable for different LED options (RGB, RGBW, White, Dynamic White, Single Color). With two different versions: clear or diffused. Color resolution of 16 bits, effects are more stylish and smooth; Exceeding the DMX protocol with more capacity and flexibility by utilizing our proprietary.

IDEL

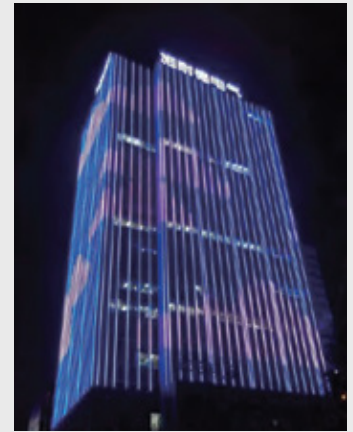

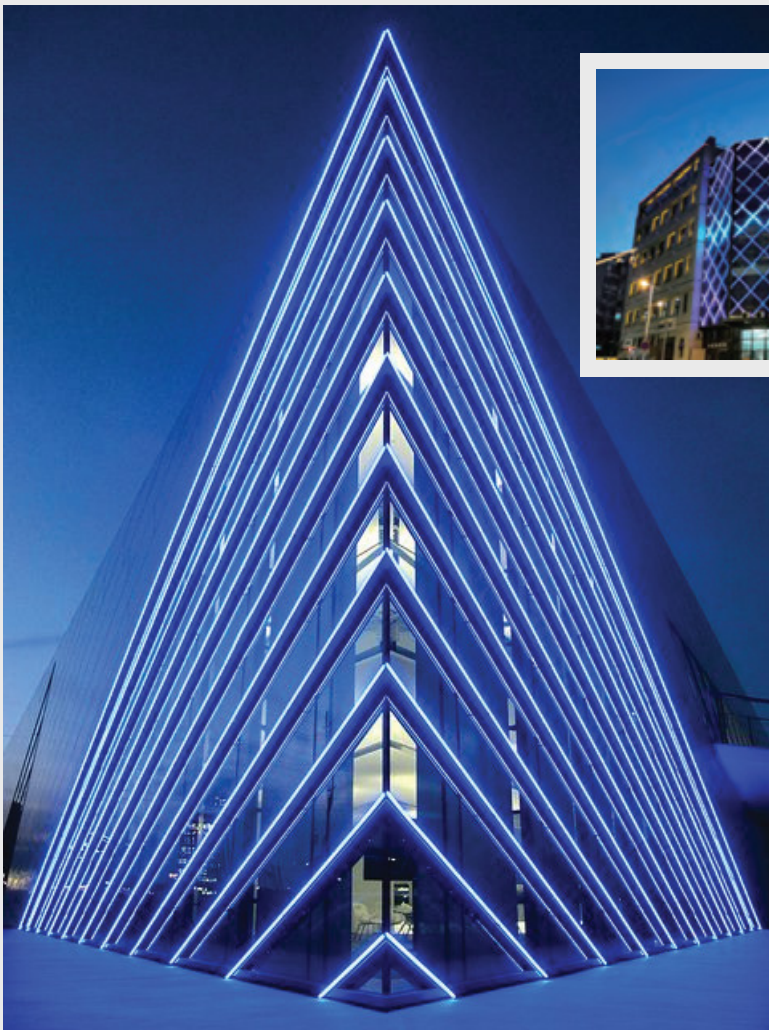

Lighting Structure

UV-resistant PC housing, Light-weight, Excellent anti shock ability, Long life and not easy to be aging or yellowing, can be mount on the building surface by bracket. The Steel wire and Aluminum Profile installation ensure reliable connections, while flexible and varied mounting options make it easy for installers to make LED fixture part of any

LED LINEAR LIGHT

Lighting Performance

ustomizable for different LED options (RGB, RGBW, White, Dynamic White, Single Color). Integral Arcylic Cover, Delicate light effect, high light transmittance, good weather resistance, acid and alkali resistance. Color resolution of 16 bits, effects are more stylish and smooth; Exceeding the DMX protocol with more capacity and flexibility by utilizing our proprietary.

Series LD22

Series GLAXO

A Series A48

A Series A24

A Series LD14-W

Lighting Structure

Aviation Aluminum Housing, High hardness, light weight, anti-oxidation and anti-corrosion, good heat conduction, Excellent anti shock ability, Long life and not easy to be aging or yellowing. Flexible and varied mounting options make it easy for installers to make LED fixture part of any structure.

LED MEDIA MESH

Media Mesh-X1

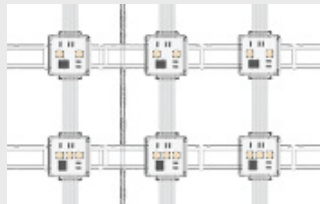

High Transparency

Mesh is an easy to install product leading to significant time and cost savings. Specific light installations and replacement of light sources are no longer required

Plug and Play

Mesh is an easy to install product leading to significant time and cost savings. Specific light installations and replacement of light sources are no longer required.

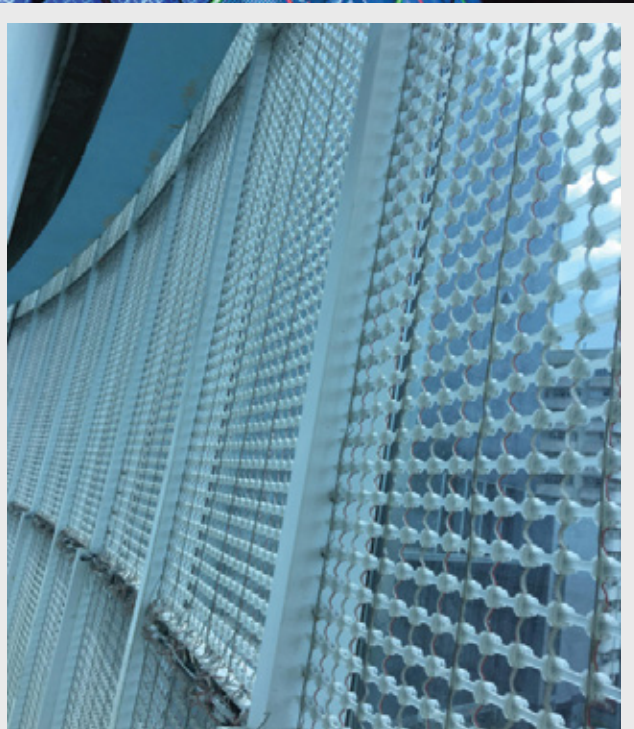

Media Mesh X6

Media Mesh X3

Media Mesh X1

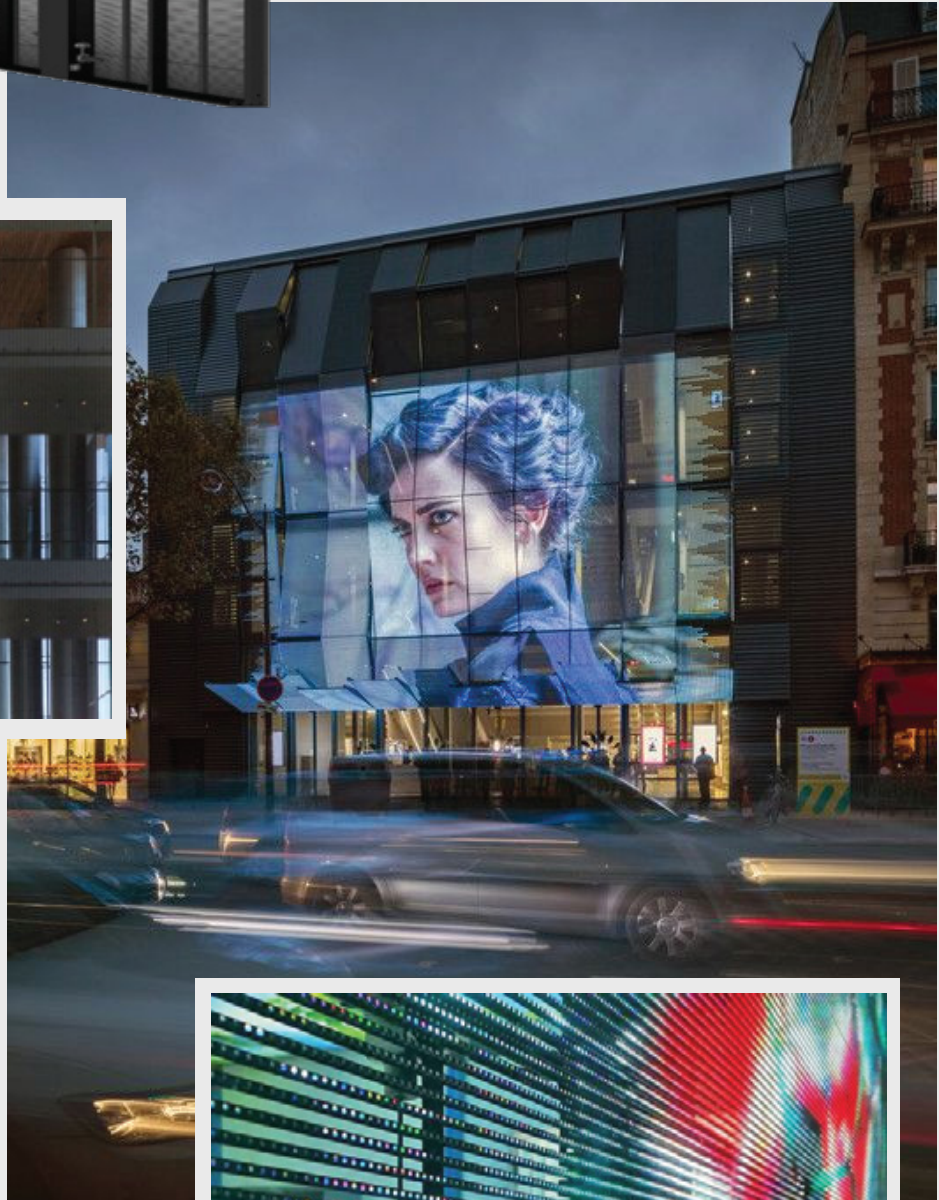

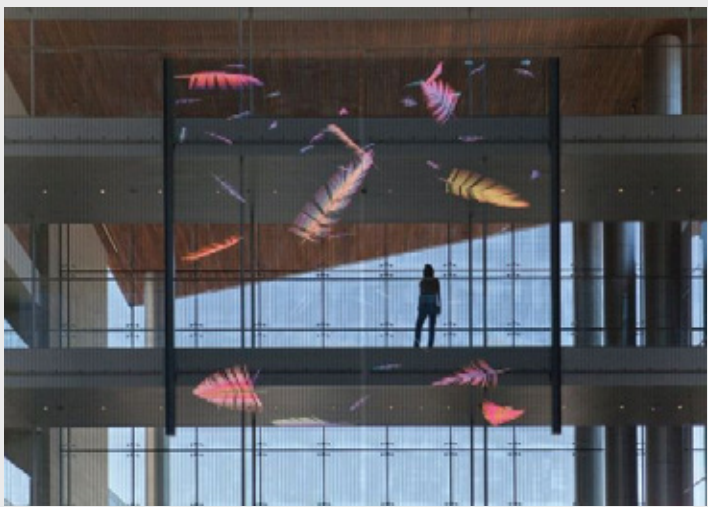

Suitable for Facade Glass curtain wall, Glass Elevator, Guardrail, Showcase, cabinet, Creative artistic landscape

LED STRIP CURTAIN

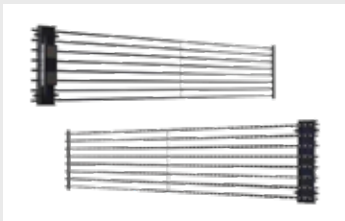

M7 plus curtain

Suitable for

Facade Glass, Curtain Wall Glass, Elevator, Guardrail Showcase, Cabinet Creative Artistic Landscape

M7 Slim Curtain

Mera Strip Curtain
